Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

1.

Claims 4,48 contain the trademark/trade name Nafion. Where a trademark or trade name is used in a claim as a limitation to identify or describe a particular material or product, the claim does not comply with the requirements of 35 U.S.C. 112, second paragraph. See *Ex parte Simpson*, 218 USPQ 1020 (Bd. App. 1982). The claim scope is uncertain since the trademark or trade name cannot be used properly to identify any particular material or product. A trademark or trade name is used to identify a source of goods, and not the goods themselves. Thus, a trademark or trade name does not identify or describe the goods associated with the trademark or trade name. In the present case, Examiner has assumed that the trademark/trade name is used to identify/describe sulfonated polytetrafluoroethylene and, accordingly, the identification/description is indefinite.

2.

Claim 51-53 are method claims depending from device claims but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claim Rejections - 35 USC § 102

3.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4,25,27-30,44-53 are rejected under 35 U.S.C. 102(b) as being anticipated by Vachon et al.

Vachon et al. teaches an implantable electrode (50) having a coating used to deliver a therapeutic agent to the patient wherein the coating is a hydrophilic, cross-linked matrix such as Nafion or a polymer containing pyrrol (column 5, lines 41,48,51-52). Examiner would like to note that due to its chemical structure, Nafion can be considered both a hydrophilic and hydrophobic material.

3.

Claims 1-3,25,26-28,44-47,51-53 are rejected under 35 U.S.C. 102(b) as being anticipated by Phipps et al.

Phipps et al. teaches an electrotransport device placed on the patient's skin comprising an electrode and a hydrophobic ion exchange material (column 9, line 7).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3763

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-6,44 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ashton et al.

Ashton et al. discloses a drug delivery device comprising an electroactive polymer consisting of poly (vinyl acetate). The degree of hydrolyzation of the polymer is a matter of design choice requiring routine skill in the art to determine optimum workable ranges.
